Issue Summary

Each row in this report is a real occurrence flagged by axe-core 4.x running in a real Chromium session. Fix the elements listed, re-run the scan, and the issue should drop off.

As of 2026-10-21. This report reflects the accessibility state of https://www.kshinfra.com/ as audited on 2026-10-21. Any changes made to the platform after this date are not covered by this audit or certificate.

Severity	Count	Score Impact
critical	0	—
serious	26	−130 points
moderate	0	—
minor	0	—
Total	**26**	**−100**

The WCAG and SEBI mappings shown for each issue come from the criterion's axe-core tag and the SEBI Circular 131 row allocation. An issue may map to multiple criteria.

Manual Audit Findings (10)

Each finding below was logged by the auditor during manual review. Voice and PII have been stripped; the remediation steps are canned per-criterion guidance keyed on the checklist item. Treat them as a starting point, not a complete spec.

manual **#1** `skip_to_main_link` WCAG 2.1 — 2.4.1

Skip-to-main-content link present

First interactive element should be a "Skip to main" anchor.

Remediation:

- Add a "Skip to main content" link as the first focusable element.
- Use landmark roles (main, nav, banner, contentinfo) to structure the page.
- Ensure the skip link becomes visible on focus.

manual **#2** `heading_hierarchy` WCAG 2.1 — 1.3.1

Heading hierarchy is correct

No h2 before h1; no skipped levels (h1 → h3).

Remediation:

- Use semantic HTML (header, nav, main, footer, button, form controls).
- Preserve DOM order that matches the visual reading order.
- Link form controls to their labels via for / id or aria-labelledby.

manual **#3** `nodal_officer_contact_in_footer` SEBI Circular 131 — Row 11

Nodal officer contact visible in footer

Nodal officer contact should visible in footer

Remediation:

- Review the criterion requirements and document a fix plan.
- Retest with keyboard and screen reader after changes are applied.

manual **#4** `color_contrast_minimum` WCAG 2.1 — 1.4.3

Color contrast meets 4.5:1 (text)

Axe color-contrast rule — text against background

Remediation:

- Ensure text contrast is ≥ 4.5:1 for normal text, ≥ 3:1 for large text.
- Verify all brand-color pairings with a contrast checker.
- Check hover, focus, disabled, and error states too.

manual **#5** `aria_landmarks_present` WCAG 2.1 — 1.3.1

ARIA landmarks present (main, nav, banner, contentinfo)

Page has explicit <main>, <nav>, <header role=banner>, <footer role=contentinfo>

Remediation:

- Use semantic HTML (header, nav, main, footer, button, form controls).
- Preserve DOM order that matches the visual reading order.
- Link form controls to their labels via for / id or aria-labelledby.

manual **#6** `isl_videos_present` WCAG 2.1 — 1.2.5

Indian Sign Language videos on key content

Scanner detects <video> elements; auditor confirms ISL overlay quality. 2 2 video element(s) detected — auditor to confirm ISL interpreter presence.

Remediation:

- Review the criterion requirements and document a fix plan.
- Retest with keyboard and screen reader after changes are applied.

manual **#7** `captions_on_videos` WCAG 2.1 — 1.2.2

Closed captions on all videos

Scanner counts <track kind="captions">; auditor confirms completeness. 2 2 of 2 video(s) have no <track kind="captions">. Auditor to confirm whether captions are delivered via an alternative mechanism (e.g. embedded CC, separate transcript).

Remediation:

- Review the criterion requirements and document a fix plan.
- Retest with keyboard and screen reader after changes are applied.

manual **#8** `focus_order_logical` WCAG 2.1 — 2.4.3

Focus order is logical

Tab to all buttons not working

Remediation:

- Let focus order follow DOM order — avoid positive tabindex values.
- When opening a modal, move focus into the dialog; restore focus to the trigger on close.

manual **#9** `reading_order_sensible` WCAG 2.1 — 1.3.2

Reading order matches visual order

> **Auditor remark missing —** *Auditor remark not provided. Engineering team should request specific guidance from the auditor before remediation. See the WCAG criterion linked below for general requirements.*

Remediation:

- Ensure DOM order matches the intended reading order.
- Avoid CSS reordering that changes the meaning of the content.

manual **#10** `accessibility_statement_present` SEBI Circular 131 — Row 10

Accessibility statement page exists

A dedicated accessibility statement page is publicly reachable from the audited platform.

Remediation:

- Review the criterion requirements and document a fix plan.
- Retest with keyboard and screen reader after changes are applied.

Findings for engineering remediation only. Not for external publication.
